ecological features

notes

Given the considerable amount of recycled content within the product it is possible for there to be a slight variation in the shade, from one making to the next. The product is completely bio-degradable and recyclable. Special runs available upon request.

The Company reserves the right to modify the technological features of the product in relation to market requirements.

Symbol Freelifie E/E is ideal for publishing, packaging, coordinated graphic materials, covers, inserts, de luxe brochures.

[applications](#)

Can be used without problems with the main printing systems: letterpress, offset, blind embossing, hot foil stamping, thermography and screen printing. Its printability is similar to Symbol Freelifie Satin: compared to this, it will probably be necessary to increase the printing pressure in order to guarantee a precise dot reproduction.

[printing suggestions](#)

The surface roughness typical of embossed papers may give rise to micro defects with plastic laminating caused by incomplete adhesion of the film to the substrate. Good results with major processing operations such as: cutting, die-cutting, scoring, folding, glueing, varnishing.
